

# SSQ 22

Reduced size and reliability: these are the strengths of the SSQ models. With the new Skid Steer, the hard manual work becomes just an old memory. Thanks to its small size, the SSQ can easily pass through doors, gates, horseshoes and narrow passages in general. The range of SSQ allows to satisfy the most varied needs of the customers by diversifying the product according to the needs to be met and the work to be done: agriculture, maintenance of the stables, gardening and greening, small construction and demolition work are some of the activities where the SSQ, thanks to the interchangeability of its many attachments, can operate with ease and in absolute simplicity.
