High Performance & Superior Power

OPSS (Operator Presence Sensing System)

Mast tilting, lifting and lowering operation is not possible when the operator is not seated in normal position. (Option)

15L / 18L / 20LA -7

Hyundai introduces with its 7-series a new line of LPG forklift trucks. Excellent power and performance improves your business profitability.

HMC BETA ENGINE

37 kW / 2450 rpm

High Efficiency Engine

The HMC BETA engine ensures an incomparable performance and durability; with its market approved quality, this engine gives an additional value to the machine. With its power of 37 kW it will fit for any work, even with special attachments that require extensive power.

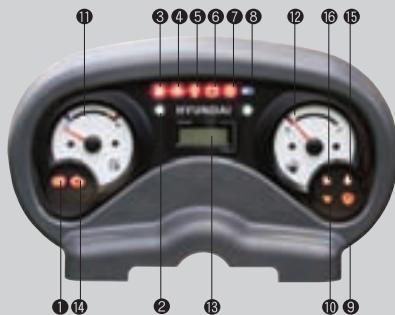

15L / 18L / 20LA -7

Smooth running, efficient and ergonomically designed, 15L/18L/20LA-7 series are made to meet your needs.

Concentrated and water-resistant instrument panel

- ① Parking brake lamp
- ② Directional indicators
- ③ Fuel warning lamp
- ④ Engine oil warning lamp
- ⑤ Transmission oil temperature warning lamp
- ⑥ Battery warning lamp
- ⑦ Air cleaner filter warning light
- ⑧ Working light indicator
- ⑨ Water separator warning lamp
- ⑩ Pre-heater indicator
- ⑪ Coolant temperature gauge
- ⑫ Fuel gauge
- ⑬ Hour meter
- ⑭ Engine check lamp
- ⑮ Seat belt warning
- ⑯ OPSS warning

Wet disc brake system

The adoption of wet disc type brakes improves the brake performance and makes your service intervals 5 times longer compared to conventional ones. A 45 % higher brake pedal effort on a 20 % slope increases your safety during operation.

Increased mast tilting angle

Utilizing the mast tilting angle of 8 degrees forward and 10 degrees backward gives the operator a safe and rapid platform for loading and unloading jobs.

Faster Travel Speed & Grade-ability

The powerful high-output engine provides greater acceleration, better grade-ability and faster travel speed on any tough terrain or slope.

Travel speed (MAX)

15L-7 : 20.7 km/h (12.9 mph)
18L-7 : 20.7 km/h (12.9 mph)
20LA-7 : 20.7 km/h (12.9 mph)

Grade-ability (MAX)

15L-7 : 37%
18L-7 : 33.1%
20LA-7 : 31%

Top Brand Worldwide

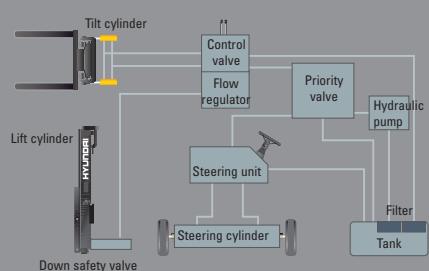

Fast and stable performance

Being able to quickly raise and lower the mast, as well as tilting forward and backward, the truck provides you the best operational conditions during loading/unloading operations. With a loaded truck, mast lowering speed is carefully controlled by a control down valve to ensure full safety on the job.

State-of-the-art hydraulic system

The latest designed, large-capacity hydraulic system including a low-noise control valve increases reaction time during operation and improves both efficiency and durability.

Comfortable Operation

Perfect fit

An ergonomically designed operator's compartment enables the driver to select the most comfortable working position for increased productivity.

A design based on human engineering relieves fatigue and increases operator's efficiency.

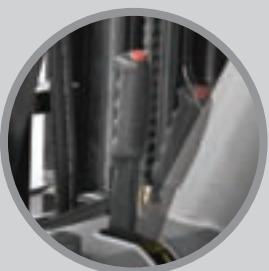

Quick Response of Control Levers

Only minimal operator's effort is required for precise, safe and productive control.

Multi-function switch lever

Multi-functional switch lever gives easy access to lights and horn.

Parking Brake

Toggle type parking brake requires less effort from the operator to set.

Adjustable steering wheel

Steering wheel with integrated horn can be adjusted by a lever on the right-hand side to improve operators comfort.

Easily adjustable suspension seat

An attractive and adjustable seat, based on a human engineering design, provides great comfort, safety and durability.

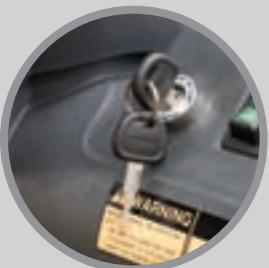

Strong overhead guard

The safety overhead guard meets EEC and ANSI regulations and protects the operator during hazardous jobs.

Cup holder & console box

Additional storage spaces are located inside the operating space for operator's convenience.

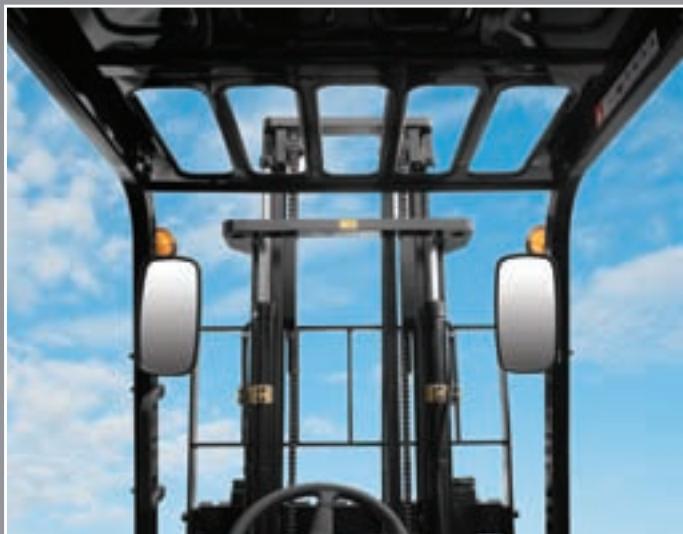

Anti-restart system

During operation the anti-restart system prevents activation of the starter.

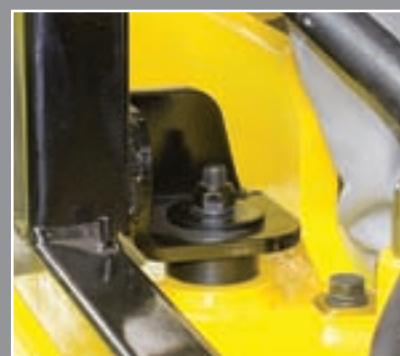

Ergonomic positioned pedals

The accelerator, brake and inching pedal are optimally positioned for higher operator's convenience, based on human engineering.

New high visibility for safe operation

The operator is able to work with increased safety and accuracy due to a wider view mast.

The latest anti-vibration and shock absorbing system

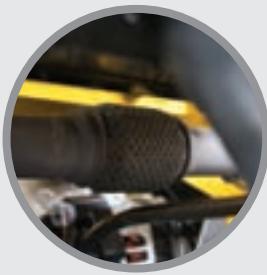

The anti-vibration rubber is installed between the guard and truck frame to reduce the source of vibration and noise while driving. This will not only reduce operator's fatigue but will also increase safety.

Endurance & Easy Maintenance

Danger-free through high durability!

Durability and easy maintenance were priorities in the design of the equipment.

Expansion bellows

The expansion bellows absorbs vibration and reduces noise generated from the exhaust gas system and extends the life cycle.

Fully hydrostatic power steering

A hydraulic steering system always guarantees smooth and flexible steering, preventing overrun and steering wheel kick-back.

Large footboard

Wide "open" step ensures easy and safe access to the operator's seat.

Rear safety lamp

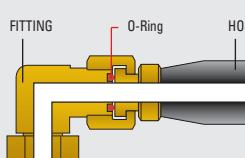

Rear combination lamps with directional indicators, rear lights and brake lights are positioned for a high level of safety.

Durable electric shift -power transmission

Durable Split Type Drive Axle

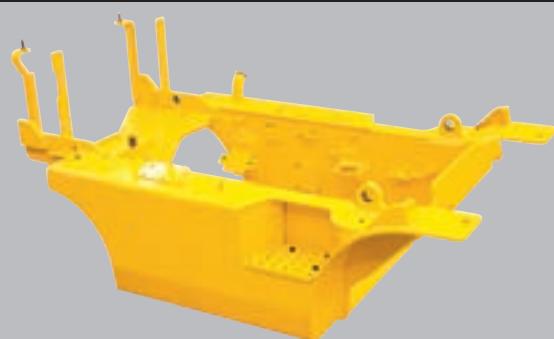

Powershift transmission provides fast and quiet travel under any heavy load condition, in order to boost work efficiency.

ORFS (O-Ring Face Seal)

ORFS type hose prevents hydraulic oil leakage.

Heavy duty single unit frame

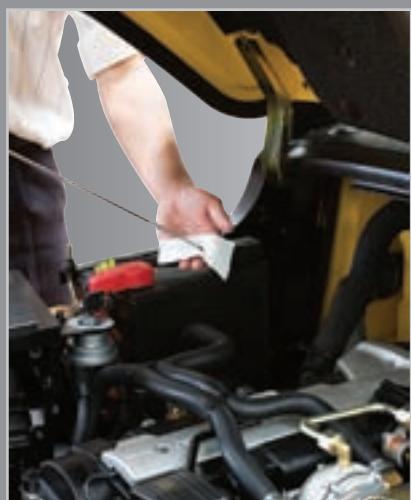

Heavy duty single unit type frame, designed on the basis of accurate structural analysis, guarantees durability and safety.

15L / 18L / 20LA -7

Centralized design for easy service!

An ideal arrangement of component parts ensures easy access and convenience for maintenance.

Engine oil check

Heat resistant
aluminum radiator

Low weight Side Cover

An accessible, compact
fuse box for easy inspection

Easy Change Air Cleaner
(6 inch Cyclone Type)

Bright, protected headlights
